For Immediate Release

L-3 Security & Detection Systems' eXaminer® XLB Chosen by Incheon International Airport

WOBURN, Mass., November 5, 2014 – L-3 Security & Detection Systems (L-3 SDS) announced today that Korea's Incheon International Airport Corporation (IIAC) has purchased 14 eXaminer® XLB explosives detection systems. To cope with increases in traffic and to strengthen its competitiveness as a hub airport, IIAC is constructing a new terminal by 2017. L-3 SDS is supplying eXaminer XLBs, an OptiNet™ networking infrastructure, and on-site maintenance and support.

"L-3's advanced, high-speed hold baggage solution provides IIAC with an efficient, networked explosives detection solution designed to meet Incheon Airport's demanding screening requirements," said Thomas M. Ripp, president of L-3 Security & Detection Systems. "We have a long-standing relationship with IIAC and are very pleased to be partnering with them again to meet their expanding security needs."

L-3's high-performance eXaminer XLB is capable of scanning up to 1,200 bags per hour, keeping bags continuously moving through a one-meter-wide CT scanner. OptiNet is a total solution for an integrated baggage handling network of any size or scope. Designed to provide meaningful analytic data from all security systems in an airport, OptiNet can efficiently and securely link up to 500 scanners, baggage viewing stations and search workstations on a single network.

L-3 SDS meets the most stringent explosives detection standards of regulators worldwide and is a leader in AT/CT systems, with an installed base of over 2,000 checked baggage systems.

About L-3 Security & Detection Systems

With more than 50,000 systems deployed and supported around the globe, L-3 Security & Detection Systems (L-3 SDS) is a leading supplier of security screening solutions. For more than 30 years, L-3 SDS has developed and manufactured cutting-edge products using advanced technologies that include 3-D computed tomography; automated, conventional and

high-energy X-ray; radiation detection; active millimeter wave imaging; metal detection; and energetic trace explosives detection.

L-3 SDS solutions are used by the aviation and transportation industries, regulatory and customs authorities, government and law enforcement agencies, and commercial and critical infrastructure facilities. Applications include the screening of people, vehicles, baggage, cargo and packages for explosives, firearms, drugs, contraband and corporate assets. To learn more about L-3 SDS, please visit the company's website at www.L-3com.com/sds.

About L-3

Headquartered in New York City, L-3 employs approximately 48,000 people worldwide and is a prime contractor in aerospace systems and national security solutions. L-3 is also a leading provider of a broad range of communication and electronic systems and products used on military and commercial platforms. The company reported 2013 (revised) sales of \$12.6 billion. To learn more about L-3, please visit the company's website at www.L-3com.com.
